

**IN THE CLAIMS:**

- 1. (Previously Presented)** A cosmetic composition comprising a first film forming siloxane polymer, and a second film forming polymer obtained by polymerizing siloxane monomers and at least one monomer selected from the group consisting of ethylenically unsaturated monomers, said polymers solvated or dispersed in a cosmetically acceptable nonpolar oil.
- 2. (Original)** The composition of claim 1 wherein the first film forming siloxane polymer is a silicone resin.
- 3. (Original)** The composition of claim 3 wherein the silicone resin is a T resin, an MT resin, and MQ resin or mixtures thereof.
- 4. (Original)** The composition of claim 3 wherein the silicone resin is a T resin.
- 5. (Original)** The composition of claim 4 wherein the T resin comprises alkoxy and/or hydroxy groups.
- 6. (Original)** The composition of claim 2 wherein the silicone resin is an MT resin.
- 7. (Original)** The composition of claim 6 wherein the MT resin is of the general formula  $M_xT_y$  wherein M is  $R_1R_2R_3SiO_{1/2}$ ; T is  $RSiO_{3/2}$ .
- 8. (Original)** The composition of claim 7 wherein the MT resin additionally comprises one or more difunctional units.

**9. (Original)** The composition of claim 3 wherein the MQ resin is of the general formula  $M_xQ_y$  wherein M is  $R_1R_2R_3SiO_{1/2}$ ; Q is  $SiO_{4/2}$ ;  $R_1$ ,  $R_2$ , and  $R_3$  are each independently  $C_{1-30}$  straight or branched chain alkyl or phenyl; and x and y are each independently 1-1,000,000.

**10. (Original)** The composition of claim 9 wherein  $R_1$ ,  $R_2$ , and  $R_3$  are each independently methyl or phenyl.

**11. (Original)** The composition of claim 10 wherein the MQ resin has alkoxy or hydroxy functional groups.

**12. (Currently Amended)** The composition of claim 1 wherein the second film forming polymer is obtained by polymerizing one or more M, D, T, or Q units with one or more ethylenically unsaturated monomers, ~~or an amide or urethane.~~

**13. (Original)** The composition of claim 12 wherein the second film forming polymer is obtained by polymerizing one or more M, D, T, or Q units with one or more ethylenically unsaturated monomers.

**14. (Original)** The composition of claim 13 wherein the ethylenically unsaturated monomer is of the general formula:

wherein R<sub>1</sub>, and R<sub>2</sub> are each independently H, halogen, hydroxyl, fluoroalkyl, a C<sub>1-30</sub> straight or branched chain alkyl, aryl, aralkyl; R<sub>2</sub> is a pyrrolidone, or a substituted or unsubstituted aromatic, alicyclic, or bicyclic ring where the substituents are C<sub>1-30</sub> straight or branched chain alkyl, or COOM or OCOM herein M is a C<sub>1-30</sub> straight or branched chain alkyl, pyrrolidone, or a substituted or unsubstituted aromatic, alicyclic, or bicyclic ring where the substituents are C<sub>1-30</sub> straight or branched chain alkyl.

**15. (Original)** The composition of claim 14 wherein the ethylenically unsaturated monomer is an acrylate or methacrylate.

**16. (Original)** The composition of claim 15 wherein the second film forming polymer is a silicone acrylate copolymer.

**17. (Original)** The composition of claim 1 wherein the nonpolar oil is a paraffinic hydrocarbon.

**18. (Original)** The composition of claim 17 wherein the paraffinic hydrocarbon is volatile.

**19. (Original)** The composition of claim 1 which is an anhydrous pigmented composition.

**20. (Original)** The composition of claim 1 which is a lipstick.

**21. (Previously Presented)** The composition of claim 1 wherein the first film forming siloxane polymer is trimethylsiloxysilicate and the second film forming polymer is a copolymer of silicone and an ethylenically unsaturated monomer which is acrylic acid, methacrylic acid, or their simple esters.

- 22. (Previously Presented)** The composition of claim 21 wherein the second film forming polymer is a copolymer of silicone and acrylic or methacrylic acid esters.
- 23. (Previously Presented)** The composition of claim 1 wherein the first film forming siloxane polymer is polymethylsilsesquioxane.
- 24. (Previously Presented)** The composition of claim 23 wherein the second film forming polymer is a copolymer of silicone and ethylenically unsaturated monomers which are acrylic acid, methacrylic acid, or their simple esters.
- 25. (Previously Presented)** The composition of claim 24 wherein the second film forming polymer is a copolymer of silicone monomers and ethylenically unsaturated monomers that are esters of acrylic or methacrylic acid.
- 26. (Previously Presented)** The composition of claim 23 wherein the second film forming polymer is a silicone acrylate copolymer.
- 27. (Previously Presented)** The composition of claim 21 wherein the second film forming polymer is a silicone acrylate copolymer and the nonpolar oil comprises isododecane.
- 28. (Previously Presented)** The composition of claim 21 wherein the second film forming polymer is a silicone acrylate copolymer and the nonpolar oil comprises cyclomethicone or linear volatile dimethicone.
- 29. (Previously Presented)** The composition of claim 21 wherein the second film forming polymer is a silicone acrylate copolymer and the nonpolar oil comprises a nonvolatile silicone.

**30. (Previously Presented)** The composition of claim 29 wherein the nonvolatile silicone is dimethicone or a phenyl silicone.

**31. (Previously Presented)** The composition of claim 21 wherein the nonpolar oil is an ester having a viscosity ranging from about 2 to 1,000,000 centipoise at 25° C.

**32. (Previously Presented)** The composition of claim 21 further comprising a chemical or physical sunscreen.

**33. (Previously Presented)** The composition of claim 21 further comprising a gellant.

**34. (Previously Presented)** The composition of claim 33 wherein the gellant is a clay.

**35. (Previously Presented)** A color cosmetic composition comprising a first film forming polymer which is a silicone resin, and a second film forming polymer which is a silicone acrylate copolymer, and a nonpolar oil selected from a volatile paraffinic hydrocarbon, volatile silicone, or mixtures thereof, and pigments.
